If you stop taking Proscar

- There may be a delay before your symptoms improve. If you do not feel any benefit straight away, keep taking the medicine for 3 to 6 months. If you still do not feel any benefit after this time, talk to your doctor.
- If you do not feel any benefit after this time, talk to your doctor.

- If you still do not feel any benefit after this time, talk to your doctor.

Possible side effects

If you would like further information about the tumour grading system or other side effects may include:

• Anxiety
• Problems with ejaculation that may continue after stopping the medication
• Male infertility and/or poor quality of semen. Improvement in the length of the semen is not common
• Pain in your testicles
• Breast swelling or tenderness
• You may have problems with ejaculation, for example a decrease in the amount of semen or a delay in ejaculation
• Skin rashes, itching, or lumps under your skin (hives). This reaction is not common
• Difficulty in passing urine
• You may have difficulties starting or stopping the flow of your urine
• Your bladder may be full more often than usual
• You may lose the urge to pass urine
• You may feel pain when passing urine

These measures will help to protect the environment.

Ask your pharmacist how to throw away medicines you no longer use.

If any of the side effects get serious, or if you notice any side effects not listed in this leaflet, please see your doctor.

If you have been given a calendar pack, do not remove the tablets from the blister packs until you are ready to take them. You should promptly report to your doctor any changes in your breast tissue such as lumps, pain, enlargement or nipple discharge as these may be signs of a serious condition, such as breast cancer.

The active substance is finasteride. Each tablet contains finasteride 5 mg. Finasteride is a type of medicine called a 5alpha reductase inhibitor. This medicine helps slow or stop the growth of your prostate. It also helps reduce the size of your prostate. This medicine is only available with a prescription from your doctor.

If you have any further questions on the use of this medicine, ask your pharmacist. He or she will be able to advise you about the risk to your health from continuing to use this medicine or from stopping it suddenly.
