FAQ

ADR Report Search

The Korea Institute of Drug Safety and Risk Management provides a variety of visualized charts utilizing the data base of the domestic pharmaceutical side effects report system. Please enter the search criteria and click the "Search" button below to see the results. Please note that these ADRs were simply reported to this Institute regardless of their relevance to the specific side effect and we cannot confirm that a side effect occurred by taking the specific drug based on this data.

* The ATC Element below doesn't contain the entire elements approved in Korea. So you won't be able to find any data without entering a specific "ATC Element" in the search area.

ATC (ATC)

Fina Steride
Finasteride

ADR Case

Search Period

20130101

~ 20161231

The available search period is from
2013-01-01 until 2016-12-31.
